

EH-QB1000W

DATASHEET / BROCHURE

Featuring Epson's 3LCD laser light source, the EH-QB1000W is an exciting addition to the world of Professional Home projectors.

Powered by a 3LCD laser, the EH-QB1000W delivers bright (3,300lm) images up to 300" at 4K resolution (3840 x 2160). Also offering a 5,000,000:1 dynamic contrast ratio, plus other image-enhancing features such as 4K frame interpolation, super resolution, dynamic tone mapping and HDR10+ to provide the ultimate entertainment experience, from movies and sports to gaming, in any media space.

Outstanding home entertainment in any space

Immerse yourself in a big-screen experience that takes home entertainment to a new level. Combining a range of unique technologies to deliver a new standard in image brightness and quality with up to 3,300 lumens, this new and leading-edge projector from Epson delivers a truly stunning performance in any room, whether it's a dedicated media space or a well-lit living area. Whether you're into movies, sport or gaming, you'll find the EH-QB1000W delivers a whole new dimension of enjoyment.

3LCD technology for ultra-high image quality

Built around Epson's advanced 3LCD laser technology, the EH-QB1000W brings stunning levels of clarity and sharpness to screens up to 300" with 4K super-resolution images (3840 x 2160). With a 5,000,000:1 dynamic contrast ratio for well-defined shadows and even deeper blacks, this Professional Home projector also features enhanced frame interpolation to create a smooth image and four colour modes, allowing easy optimisation for different viewing environments.

Advanced features for excellent versatility

With advanced features such as Dynamic Tone Mapping to enhance visual quality on a frame-by-frame basis, and HDR10+ for more vivid and lifelike colours, the EH-QB1000W delivers an outstanding viewing experience for both movies and sport. But the amazing versatility of this breakthrough projector doesn't stop there. With HDMI 2.1 connectivity, a 4K/120hz refresh and Auto Low Latency Mode, it offers a superbly-smooth gaming experience too.

Great positioning flexibility and easy management

Featuring motorised lens shift with large range, as well as motorised zoom and focus, the EH-QB1000W offers outstanding positioning flexibility – so you never need to worry about installation in your living room. Plus, its integrated Crestron, Control4 and RS232C/wired LAN support means that it can be easily integrated into a Smart Home Network, making it an even more convenient viewing experience.

	Improper installation of the projector on a ceiling or wall may cause it to fall, leading to potential injury or damage. To prevent this, ensure the ceiling mount is securely fastened using all mounting points specified in the projector's user guide which is available to download from our support website (www.epson.eu/support). We recommend the use of Epson-approved ceiling mounts that are compatible with the projector model. Additionally, attach a safety wire of adequate strength to secure the projector to the ceiling mount. If the projector is suspended from a ceiling or wall mount and installed in an environment with heavy oil smoke or places where oils or chemicals are volatilized, places where a lot of smoke or bubbles are used for event staging, or where aroma oils are frequently burned, it can make certain parts of our products susceptible to a material degradation which over time could break and cause the projector to drop from the ceiling. We recommend that the equipment be inspected on a regular basis, either by the user or by a qualified professional, to ensure continued safe operation. If you are concerned about the environment in which your projector is installed, or if you have any other questions, please contact our support department and they can provide additional assistance.
